"It is not the strongest or the most intelligent who will survive but those who can best manage change."

Charles Darwin

eDisclosure intelligently evolved

Transparent pricing and exceptional value for money

Just like using cīcayda, getting started could not be simpler. We have designed our Terms and Conditions to help you get your project live as quickly as possible. We provide:

No long term contracts or sign up fees.

Transparent per GB per month pricing.

Unlimited Users, absolutely no per user fees

No software installation, just open your browser and login.

Litigation Support Services from Legastat

Legastat is delighted to be the exclusive provider of the cīcayda suite of products for the UK and Ireland. As a leading provider of litigation support services since 1953, we recognise a ground breaking product when we see one.

Should your project require additional support, you can rely on Legastat to provide you with a full range of litigation support services. We are experts in legal reprographics and hard copy scanning and document coding as well as a huge range of electronic litigation support services. We are proud to have been selected as one of only 3 suppliers to provide disclosure services to government via framework RM924.

About cīcayda and Legastat

Based in Nashville, Tennessee, cīcayda delivers cloud-based applications for electronic litigation. Led by the former CaseLogistix CEO Roe Frazer, cīcayda is run by people who have done it all before! Their suite of electronic litigation products (all provided by Legastat in the UK) includes legal hold management, data processing, review, disclosure and text and document analytics.

The strategic partnership between cīcayda and Legastat joins two companies with vibrant personalities, a rich history and formidable industry experience.

faster • cheaper • better
